Needs

Efficient automated system for their students attendance tracking

Solution

[BioTime](#), delivered and implemented by our official distributor Bio-Metrica LLC, is a flexible and scalable biometric fingerprint time and attendance system that grants schools the ability to track their student's schedules and to reduce inaccuracies prevalent in older non-biometric systems such as sign in sheets or manual headcounts.

With biometrics, BioTime ensures schools that attendance times reported are correct and verified by the fingerprint of the student. In addition, for organizations such as Ross University, integration of existing systems is an important consideration. With Microsoft Active Directory (AD) connector utility Ross University was able to transfer all of their student information from AD and into BioTime with just a single mouse click.

Customer's Reference

Since BioTime's installation, Ross University has been able to accurately track the attendance of students attending laboratory courses. By placing BioLink FingerPass terminals at each lab entrance, the School can now track when a student enters and leaves the lab. The BioTime system also produces detailed reports for analysis.

"It's important for us to make sure our students are attending classes and labs to fulfill their graduation requirements. With BioTime and the FingerPass wall-mounted terminals, we can ensure these future doctors are spending the time they need to excel in their education. BioTime lets us manage attendance with a level of certainty and precision we didn't have previously"

Crispin Wallace, IT manager, Ross University

"With BioTime, schools can be assured their students will be where they need to be. When fallibility and reliability of older, non-biometric, systems come into question, BioTime's use of biometrics ensures that students are present and at their scheduled class or lab times"

Ronen Yacobi, CEO of Bio-Metrica, LLC.

About BioLink Solutions

BioLink Solutions is a trusted global provider, supplier and expert in biometric identification solutions, systems and professional services.

Employing the best international practices and scientific developments, BioLink is committed to building, deploying and maintaining a full range of award-winning biometric identification and identity management solutions worldwide.

Our portfolio contains more than 5000 successful implementations in USA, UK, Ireland, Scotland, Nigeria, Malasia, Lithuania, India, Russia, Kazakhstan and other countries.
